

Peavey ValveKing 112 Head Conversion

Version 3 – match depth of boxes

Note: Measurements are ID as I'm not assuming the dimensions of the construction material.

Design a 1x12 cab to match the dimensions of the head.

Depth should be at least 10". I noticed your 1x12 cab is 11" deep... I want the depth of the head box to match the cab.

Bolt holes on top of cab are measured to center, and are $\frac{1}{4}$ "

I want this color scheme
